

County Plan #	Objective Title	Objective	Target
#103	Safe Pesticide Use	By June 2021, the Agricultural Commissioner will increase issuance of pesticide use permits by 15% over 2018 levels, to foster safe and effective pesticide use, and protect agricultural lands and natural resources.	282 Pesticide Use Permits
Measurement			
Monitor the number of permits issued to growers of each agricultural industry. When growers are registered with the County Agricultural Commissioner, they are provided with educational opportunities for safe pesticide use and are subject to regulation.			
Collection Method			
When permits are issued to growers, the information is entered in the database which can be queried for target time periods (2018 through 2021).			
Data Summary			
Our goal was to work with the new and emerging Cannabis and Hemp industries to increase education on the responsible use of pesticides.
